INTRODUCTION:

Aiming for Red Team Operations, actively looking for new opportunities to upscale my career. I continue to learn and build my skills in Offensive Security. Looking for the role of **Cyber Security Intern**.

TECHNICAL SKILLS:

- **Python Programming** - OS, subprocess, Tkinter, regex
- **Linux Fundamentals and Shell familiarity** - Fundamentals of file system, navigating through linux..
- Hands On Experience with **FTP, SMB,SSH,Telnet**.
- **Methodical and Detail Oriented**

PROJECTS:

- [\[Link\]](#) **MacNinja** - A python based cybersecurity utility which can help in quickly spoofing the Mac(Media Access Control) Address to learn about how things work in the Network Layer. **Attackers** can use this for spoofing mac addresses with router accepted MAC addresses and route data to themselves, meanwhile **Defenders** can use the same for understanding how to tackle attackers.
- [\[Link\]](#) **TryHackMe Writeups** - Each writeup showcases my fundamental learnings from practical experience, and hands on skills I acquire by completing every room.
- [\[Link\]](#) **HackTheBox Writeups** - Each writeup showcases the challenges, the skills, the practical experience and real world references about every room I complete.

WORK EXPERIENCE:

- **MacNinja (regex,os,subprocess,sys,random,Tkinter)**

Forage Internships Include:

1. CommonWealth Bank Australia - Intro To Cybersecurity (August 2025),
2. Deloitte Australia - Cyber Security Analyst, (August 2025)
3. TCS - Cybersecurity Team (August 2025)

EDUCATION:

GGSSIP University | Vivekananda Institute Of Professional Studies **BCA(hons.)**
[2025-2029]
